

Co-funded by the
Erasmus+ Programme
of the European Union

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Programme: Erasmus+, Strategic Partnership,
Vocational Education and Training

Participating countries: Spain, Hungary, Italy,
Sweden, Ireland

Project duration: October 2017 – September 2019

Project ID: 2017-1-ES01-KA202-038673

Project website: <http://wamdia.eu>

PARTNERS

WAMDIA wants to change the mentality of traditional ICT users. Everybody can contribute to accessibility by ensuring most usual files they create are accessible: word processor files, presentations or pdf files are clear examples. Moreover, this contribution is key because even the most accessible website is useless if a single file uploaded on it is not accessible. **WAMDIA** will allow ICT users to contribute to making digital information accessible.

Target groups

- Public employees and manager;
- Teachers and students in non-ICT programs in all types of VET and higher education;
- SME managers and employees;

Objectives

- Study on digital accessibility and VET in each country;
- Design of awareness and curriculum strategy in digital accessibility, with connections to qualification frameworks and certifications that will extend the sustainability of the action for the future;
- Awareness and training resources in digital accessibility such as OER (Open Educational Resources) highly transferable, accessible and multilanguage with easy adaptation to new countries.
